3D ELECTRONIC MEASURING SYSTEM

HIGH DEFINITION LASER - HDL

REF NO: EAGLE01.104

LASER TECHNOLOGY

Shoots the target in milliseconds and the measuring results are displayed in the software.

The all new 3D laser measurement system with self learning user interface.

The car body measurements can be carried out much more accurately with laser measurement system, compared to traditional technology.

- Online 3D software for vehicle database.
- Wireless connectivity between the Laser gun, Targets and Software - WiFi technology.
- Unlike traditional technology, EAGLE does not require reference points measurement.
- Leveling of the vehicle is not required in EAGLE - PATENTED TECHNOLOGY.
- Ideal for Insurance diagnosis report - Complete vehicle body measurement in less than 10 minutes.
- Accuracy: +/- 0.5 mm.
- Original data from OEM.
