ZERO STATIC

The Walcom® ZERO STATIC antistatic gun is the ideal tool for neutralizing static electricity on parts to be painted.
Static electricity causes paint contamination, can change the orientation of metals, and attract dust and dirt.
The ZERO STATIC completely neutralizes this static charge, rendering the parts to be painted, whether metal or plastic, completely neutral.
The ZERO STATIC has a body over-injected with a specific non-conductive rubber, which protects it from accidental impacts, ensuring a longer product life. It is equipped with a pressure regulator and pressure gauge.
The ZERO STATIC is ATEX certified: ECM 23 ATEX-B QO25.

Walcom® SPRAY GUN EVOLUTION

MADE IN ITALY

ATTENTION!

For proper operation of the gun, do not charge it for more than 4 hours and always use it at the recommended pressure of 2 - 2.5 bar at a distance of 15-20 cm from the support.
The red LED lights up only when ON and not while charging.

ITEM ID	DESCRIPTION

ZERO STATIC

60182/EU	Antistatic gun with pressure regulator and pressure gauge - 230V
60182/USA	Antistatic gun with pressure regulator and pressure gauge - 115V

Application: to produce ion-charged air to eliminate static charge on surfaces
Air consumption: 310 l/min at 1.5 bar
Continuous use time: 6 hours
Power supply: nickel-hydrogen battery
Full charge time: 4 hours
Recommended air pressure: 2 bar (29 PSI)
Packaging: 1 pcs
Weight: 648 g
