➤ Multipads® are rectangular plastic strips available in various sizes, featuring bonding surfaces in the following configurations:

Flat: the most commonly used Multipads®, ideal for complex dents larger than the pad itself;

Conical and convex spherical lenses: is best suited for pillars and particularly deep small

➤ The 4-season hot glue, developed using MWM's proprietary formulation, ensures quick and reliable bonding of the tabs while allowing easy removal. The MWM solvent, engineered to work in synergy with the glue, removes residues effectively without affecting the original paint finish.

➤ Designed for medium to heavy dent repairs, Multipads® require the use of high-force pulling systems such as pulling bars, slide hammers over 2 kg, and pulling towers.

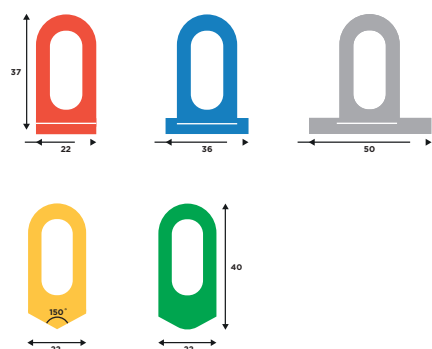

GLUE MULTIPADS® KIT

System designed for the rapid removal of large dents without the need for repainting, using MWM-patented Multipads® technology. The kit includes all necessary tools for the application and removal of the Multipads®, and is supplied in a durable, lightweight case with a padded interior for optimal tool protection.
