BUTTERFLY EVOLUTION	Cod. BFHEVO
3,5 kW	PORTABLE INDUCTION HEATER FOR BODYSHOP

Designed for body work shops.
One-of-a-kind for its characteristics, it combines the possibility of using the 3.5kW liquid-cooled power torch and the specific body shop accessories, suitable for easily removing adhesives without leaving glue residues, raising dents caused by hail and easily removing fixed vehicle windows.
It immediately heats the piece, for straightening and releasing **ferrous material or aluminium elements**.
The liquid cooling system makes it possible to perform heating tasks without interruption.
No naked flames means it is also possible to work near cables, pipes or other heat-sensitive parts.
Weighing 9 kg it is the smallest heater of its kind, suitable for body work shops, tyre shops and car shops. The machine is equipped with a special **INSULATION TRANSFORMER** that guarantees maximum operator safety, even in the most unexpected conditions.

TWICE THE HEATING, HALF THE CONSUMPTION AND WEIGHT!

Thanks to its exceptional characteristics of yield, efficiency and weight/power ratio (9kg/3.5kW) this model compares to no other induction heater on the market.
The liquid-cooled power inductor creates heat directly inside the metal at a depth of 2.5 mm. It can heat a surface area of 30x30mm (thickness 3mm) to red heat (800°C) in just 4 seconds.
- Optional: trolley
- Optional: torch support arm
- Possibility of using air-cooled auto body accessories.

NEW PATENTED INDUCTORS WITH QUICK CONNECTION

Wide range of patented inductors which increases its efficiency, easy to replace in seconds.
The flux concentrator and the protective cap resistant to high temperatures are blocked without glue.

STANDARD INDUCTOR	*FRONT INDUCTOR*	*ROUND TIP INDUCTOR*	*RING INDUCTOR*

AUTO BODY ACCESSORIES

Specially designed for body work, they allow you to easily remove dents without having to repaint, remove adhesives or mouldings without leaving glue residues, remove rear windows and the fixed side windows by dissolving the glue that seals them, without leaving putty on the body.
